## Vaccine Scandal Exposed This may be the Greatest Medical Scandal of All Time

by JC Spencer

A pharmaceutical giant is caught in deceptions and lies. Dr Bernard Dalbergue, Merck's former physician, predicts that Merck and the vaccine Gardasil will become the greatest medical scandal of all time.

The vaccine's toxic corruption was made possible in the United States when the U.S. Congress gave vaccine companies a shot in the arm with legal protection. The financial interests for this vaccine runs deeply in political circles disregarding all evidence of the damage caused.

A press conference was called in Paris on April 2, 2014 by Michèle Rivasi, MEP Vice-Chair of the Greens/EFA in the European Parliament. The topic was Gardasil, a vaccine manufactured by Merck. A few of the excerpts from the conference include:

- Gardasil is useless and costs a fortune! In addition, decision-makers at all levels knew it was worthless.
- Everyone knew when this vaccine was released on the American market that it would prove to be worthless! Diane Harper, a major opinion leader in the United States, was one of the first to blow the whistle, pointing out the fraud and scam of it all.
- Cases of Guillain-Barré syndrome, paralysis of the lower limbs, vaccine-induced MS and vaccine-induced encephalitis can be found.
- Today in Europe, many young women, aged 18-24 years without medical history are affected with very debilitating diseases that could be attributed directly to vaccination.
- Austria refused to include these vaccines in their schedule and Japan no longer recommends this vaccination; many challenges exist in other countries.
- For all of these reasons, MEP Michèle Rivasi calls for a moratorium: member states must stop recommending this vaccine until more studies are conducted on Gardasil, its effectiveness and dangers.

Within a few hours after the story broke, I contacted my Sunday School teacher, who happens to be Mark Lanier, the attorney who won the landmark victory in the nation's first Vioxx trial *Ernst v. Merck*. U.S. News and World Report's Best Lawyers named Mark as the Top Class Action Attorney in America in 2013. His response to me about the scandal was, "...no surprise here. The sad part is the company has protection from the government."

### PHARMACEUTICAL SCANDAL REPORT

U.S. law prevents anyone from suing Merck or any other vaccine manufacturer. The U.S. Congress inoculated vaccine manufacturers with total immunity from civil lawsuits in 1986, and that legal protection allows them to place into the market as many vaccines as they choose. This law was upheld by the U.S. Supreme Court in 2011. It is also reported that the National Institute of Health receives royalties from the sales of Gardasil. Merck does not have the same legal protection outside the U.S., and here is where lawsuits over injuries and deaths related to Gardasil will blossom.

Vaccines have become an international controversy, while medical and media acceptance here in the United States is sustained. Anyone who dares say anything against vaccines is ridiculed. Still your doctor and your sphere of influence need to know this story.

For two decades I have said that specific sugars strengthen the immune system. The Merck scandal gives validity to everyone who has ever objected to a vaccine. Perhaps its time for us all to take "placebos" known as "sugar pills". Glycoscience, the study of sugars is the next great frontier of medicine that can build the immune system. Smart Sugars make human cells healthy.
